EXPERIENCES

YTL Shared Services Sdn Bhd (Front End) 4 months

- Developed an internal e-invoice system integrated with LHDN, enabling drivers to submit invoices via a role-based access platform.
- Implemented income and expense tracking, statement of accounts, and invoice reporting using Power BI and SQL Server Report Builder.
- Designed and developed the SMHE corporate landing page, showcasing truck products with Google Maps integration and contact forms.

Quantitative Trading Company in Balaena Quant (Front End) 4 months

- Developed and optimized UI components using React, Next.js, Tailwind CSS, TypeScript, and PostgreSQL.
- Integrated candlestick and bar chart visualizations with the TradingView API for real-time financial data.
- Enhanced wallet security UI and implemented robust error-handling interfaces to improve user experience.

SELECTED PROJECTS

Next.js / React / TypeScript

- YTL Concrete Hub (AI eCommerce Platform)
 - Developed an AI-powered eCommerce platform for YTL Concrete featuring product recommendations, smart comparison, AI chatbot support, image-based material classification, and predictive dashboards for stock and inventory management.
- SpotWave (Music Application)
 - Spotify-integrated platform for discovering songs, lyrics, and artist information with animations using Framer Motion.
- Weather Forecast Application
 - Provides accurate weather updates, forecasts, and theme customization options.
- Reka Konsult Company Profile
 - Corporate site showcasing company services, background, and contact information.
- SplitTrack (Expense Tracker)
 - Tracks group and personal expenses, offering analytics and trip expense sharing.
- SassyDispute (Ethereum KL Hackathon)
 - Web3 dispute resolution platform bridging Web2 and Web3 e-commerce using IPFS and smart contracts.
- VoteChain (Devmatch Hackathon)
 - Blockchain voting system enabling secure and transparent organizational voting.

PHP / MySQL

- Online Workforce Monitoring & Management System
 - a staff management system that facilitates team communication, task distribution, and attendance monitoring for productive remote work.
- Pet Care System
 - An appointment and record-keeping system for customers and staff to manage pet care scheduling, staff duties, and service history.

Java

- Hotel Booking Management System
 - Enables staff to manage room bookings, check-ins, cancellations, and customer information efficiently.
- Furniture Management System
 - Simplifies operations for managers and delivery personnel to manage sales, updates, and order statuses.

Python

- PythonGPT (Google Cloud Vertex AI Hackathon)
 - AI-powered learning platform for Python beginners using Vertex AI and Gemini Model to provide chatbot assistance, code examples, and documentation.
- Hotel Booking Management (Python Prototype)
 - Simplifies hotel reservation management with booking, modification, and cancellation features.

HTML / Flask

- Google Cloud Vertex AI Agent Builder Hackathon
 - Developed a chatbot platform tailored for Python learning, focusing on interactive tutorials and user engagement.
